A TRIBUTE TO NATURE

The new Sanya Club Med village celebrates nature, the meeting of land and sea, in an atmosphere bathed by the sun. This is a known and popular destination. Therefore, what does make the difference with other hotels? First, its exceptional location that allowed it to have such a wide beach and have no immediate neighbours. It is a place where you can breathe. In developing this project for CLUB MED, the STUDIO MHNA wanted the project to be rich, luxurious, easy-going, creative, innovative, comfortable, colourful, full of life and fun. It is designed for couples, holidays with friends and families. The Lobby celebrates nature. When we walk forward, we discover a fabulous perspective on this very rich plant-filled park and of course, on the China Sea. That's why we wanted to represent here and from the entrance, the plants on one side and the ocean on the other side: paintings and spikes of blue that will punctuate the whole lobby under different forms, as this big green world map and other nods to the vegetation that is found in the design of the coffee-tables and touches of green as well as some fabric choices. The Main Restaurant is a tribute to the elements. The buffet area was dealt fairly dark and neutral, with these ideas of strata representing the earth in order to showcase the products. This is this earth that enables vegetable and fruit growing, even those that will be transformed, prepared and ready to be served and presented here.

Another dining-room refers to metal, yet another to wood, one of the terraces represents the fire, and finally the floating pavilions and terraces that symbolize the connection with the water: clubmed.co.uk
